Bala Krishna Dasari

Email:dasarib065@gmail.com | Phone: +1 236-885-7933 | Location: Canada
Senior Business Analyst | Data Science & AI Consultant | BI Specialist

Professional Objective:

- To leverage my 8+ years of experience as a Business Systems Analyst across **Finance**, **Healthcare**, and **Logistics** industries with growing responsibilities in PMO portfolio oversight, cross-functional project alignment, and executive reporting. I aim to drive digital transformation through AI-powered solutions, advanced data analytics, and process optimization. Eager to contribute my skills in machine learning, cloud technologies (Azure, AWS), and agile methodologies to solve complex business problems, enhance operational efficiency, and deliver measurable business value.

Professional Summary:

- Proficient in **Data Science**, AI, and Machine Learning concepts; applied these in predictive analytics and automation use cases.
- Hands-on with **Supervised** and **Unsupervised** ML algorithms: Linear/Logistic Regression, Decision Trees, Random Forest, SVM, K-Means, PCA, and Time Series Forecasting.
- Professional expertise includes business systems applications, disaster recovery planning, process mapping/analysis, and backend system development. Results-driven professional with deep expertise in relational databases, backend systems, and enterprise applications.
- Experienced in applying data governance principles within enterprise systems, including metadata standardization, data quality validation, and access control—most notably during CIAM implementation at Canada Post.
- Strong knowledge of relational databases and backend programming with experience in maintaining complex, mission-critical systems.
- Successfully contributed to AI-powered Smart Sort application (**Purolator**) – led requirement gathering, data flow mapping, and AI-driven logic for predictive routing and address triaging.
- Experienced in translating business challenges into data-driven solutions by collaborating with developers and data scientists.
- Skilled in evaluating ML models using confusion matrix, precision, recall, F1-score, and ROC-AUC.
- Designed and maintained KPI scorecards in Power BI to track logistics performance, SLA compliance, and AI model impact across delivery workflows.
- Developed advanced Power BI dashboards with DAX calculations and dataflows to visualize daily route performance, sort plan effectiveness, and predictive routing success rates.
- Experience on the Guidewire platform, specifically in ClaimsCenter, within the General Insurance domain (Health Care).
- Strong domain expertise in Banking, Canada Post logistics, and US Healthcare/Pharmacy (Walgreens – O2C processes).

Bala Krishna Dasari

- Worked with shipment, retail, and pharmacy POS data to uncover delivery patterns, bottlenecks, and service improvements for North American logistics operations.
- Presented analytical findings and dashboard reports to business stakeholders and external client teams, supporting strategic decisions during quarterly business reviews (QBRs).
- Proficient in SQL queries, stored procedures, backend testing, and issue analysis.
- Built and optimized database objects (functions, triggers, views, indexes) across Oracle, SQL Server, DB2, and MongoDB.
- Validated large datasets for completeness, format conformity, and consistency across systems during cloud migration and reporting automation efforts.
- Utilized **AWS Cloud** services (CloudWatch, Lambda) for monitoring and workflow automation.
- Contributed Lift-and-Shift cloud migration strategies using Azure Migrate and 3rd-party tools.
- Created Business Requirement Documents (BRDs), Functional (FRS), User (URS), and Change Requests (CRs).
- Liaised between technical and business stakeholders to ensure successful delivery of end-to-end features.
- Managed and tracked QAT/UAT defects, test planning, and regression cycles using HP ALM and Excel.
- Conducted both backend and UI testing, including performance and security testing.
- Developed detailed process flows and supported system design documentation.
- Extensive data experience in ETL, warehousing, data profiling, modeling, business intelligence, and governance.
- Skilled in Python (Pandas, NumPy) for automation and data manipulation; built dashboards using Power BI and Tableau.
- Led onboarding/training sessions for new team members and provided ongoing support.
- Involved in UX design enhancement and Agile-based engineering workflows.
- Assisted Product Owners in drafting user stories and UI mockups, supporting iterative development.

Certifications:

- Certified Scrum Master (CSM)
- Certified Scrum Product Owner (CSPO)
- Trained in **Advanced Data Science & ML**
- Trained in Manual Testing and POSTMAN API Testing

Technical Skills

- **AI / Data Science & ML**: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook

Bala Krishna Dasari

- **Machine Learning Techniques**: Linear/Logistic Regression, Decision Trees, Random Forest, SVM, K-Means, PCA, Time Series Forecasting, Model Evaluation (ROC-AUC, F1, Confusion Matrix)
- **Data Analytics & Visualization**: Power BI (DAX, KPIs, Dataflows), Tableau, Oracle BI
- **Databases & Querying**: SQL Server, Oracle, MySQL, DB2, MongoDB
- **ETL & Data Processing**: Data Profiling, Cleansing, Modeling, Warehousing, Governance
- **Project & Agile Tools**: Jira, Confluence, SharePoint, MS Office, HP ALM
- **Modeling & Diagramming**: MS Visio, ER/Studio, Balsamiq, SmartDraw
- **Methodologies**: Agile-Scrum, Kanban, Waterfall
- **Programming**: Python, Java, Data Visualization
- **CI/CD & Repositories**: GitHub, Jenkins, TFS, Bitbucket, Bamboo
- **Testing & Web Services**: Postman, Selenium, Cucumber, SOAP UI
- **Office Tools**: MS Word, Excel, PowerPoint, Project, Office 365

Project Profiles:

Project: Smart Sort AI Application
Client: Purolator | **Company:** Infosys Canada
Duration: June 2024 – Present
Role: Senior Business Analyst / BI Consultant

Key Contributions:

- Led the migration of a legacy logistics system (Smart Sort) to Azure Cloud, integrating AI for predictive routing and operational efficiency.
- Gathered and refined business requirements for Smart Sort, an AI-powered logistics application delivering real-time package sort instructions.
- Developed and enhanced Route Plan Management and Sort Plan Management modules, resolving conflicts using postal code (FSA) and terminal mapping logic.
- Designed predictive routing using AI/ML logic to optimize load balancing and reduce manual interventions in delivery truck allocations.
- Implemented automated sort plan override logic in collaboration with development and QA teams to ensure route integrity and uptime.
- Integrated Smart Sort with InfoHub, a centralized data repository, for seamless data flow and real-time AI model updates.
- Built an AI-assisted Address Triaging module to auto-correct invalid/incomplete delivery addresses, improving first-attempt delivery rate.
- Documented existing legacy workflows (10+ years old), created new process flows, and led

Bala Krishna Dasari

modernization efforts focused on intelligent decision-making systems.

Project: Digital Identity & CIAM Transformation
Client: Canada Post (Innovapost) | Company: Infosys – Canada
Duration: September 2022 – May 2024
Role: Senior Business Analyst / Business Consultant

Key Contributions:

- Engage key stakeholders, including end users and small & medium enterprises to identify key business requirements and produce comprehensive mapping, impact analysis, and functional specifications.
- Ensured data governance compliance in CIAM system by defining metadata standards, validating identity data during migration, and supporting access control logic for role-based security.
- Partner closely with functional groups to analyse processes and requirements. Generate use cases & user stories, process flows & activity diagrams, data models, functional specifications, and support documents.
- Partnered with external clients and compliance teams to implement controls around **customer identity verification**, enhancing fraud detection and AML screening capabilities.
- Supported initiatives targeting **parcel theft and suspicious activity**, aligning operational processes with AML regulatory expectations.
- Developed crucial functional requirement specifications, creating detailed use cases and process flow diagrams to support functional specifications.
- **Defined and tracked key performance indicators (KPIs)** related to user identity verification success rates, data migration accuracy, and authentication response times.
- Provided KPI insights during **PMO steering reviews** to support prioritization, issue resolution, and alignment with regulatory timelines
- Strong domain knowledge in **Anti-Money Laundering (AML)** with expertise in screening, fraud detection, and risk scoring, aligning data-driven insights with compliance and regulatory standards.
- Utilized Jira, Confluence, Slack, and other tools to track work-in-progress, measure burndown, and ensure efficient collaboration.
- Created and maintained multiple Slack Channels for team communication.
- Conducted meticulous GAP analysis while successfully reengineering key business processes to increase operational efficiency and alignment of business unit objectives.
- Utilize project management tool to perform user acceptance testing (UAT) &exposure, and operational readiness testing (ORT).
- Implemented Agile Scrum Methodology throughout the organization to improve communications between Developers, Product Management, and Business; to provide more transparency across the departments; and to obtain great business value with short turnarounds.
- Define technical requirements and document plans for project lifecycle deployment including the scheduling of project deliverables, budgets and timelines.
- Direct all IT deployments and job scheduling with oversight for vendor and consultant management.
- Worked as an Agile Scrum Master/consultant where Scrum, Kanban techniques were applied.
- Organized and facilitated overall Release and Sprint Planning – including daily stand-ups, reviews/demos and retrospectives.

Bala Krishna Dasari

- Focused primarily on training the teams to write good user stories, prioritize the work based on business value and handling of the tasks by the team. Placed substantial efforts on team member role training, timeboxing and providing strong metrics for all players
- As a Scrum Master, identified process changes required to accelerate development and remove major impediments. Facilitated Scrum of Scrum calls following agile process.
- Protected team from over commitment, managed backlog, prioritized resolution of defects/bugs.

Project: Online Banking Modernization
Client: Equitable Bank | Company: EQ Bank – Ontario
Duration: July 2021 – August 2022
Role: Senior Business Analyst

Key Contributions:

- Led business analysis for AML screening and risk workflows, analyzing how customer and transaction data impacts fraud detection, regulatory compliance, and operational decisions in the Work Fusion automation platform
- To create resource plan, develop test strategies, test plan.
- Performed QA Analyst activities in testing Online Banking Project
- Discussed the project timeline with the Project Manager for updating the Test Plan Timelines.
- Conduct elicitation, analysis, and validation of business needs for key stakeholders.
- Gather requirements through various methods including interviews, questionnaires, surveys, and storyboards.
- Take charge of user story creation and definition workshops for gathering functional specifications.
- Support backlog grooming and sprint planning activities.
- Translate conceptual requirements into functional requirements that are easily understood by the development team and project team.
- Develop process flows, diagrams, specifications, and charts to guide the project team and developers.
- Conduct research on technical solutions and analyse options, risks, cost benefits, and support requirements.
- Manage and lead User Acceptance Testing.
- Evaluate the feasibility and cost benefits of proposed system designs or enhancements through conducting cost-benefits/feasibility analysis and ROI.
- Provide guidance on data integrity and data structure standards and related issues.
- Facilitated meetings to iron out blockers, conducted JAD sessions with the product owner and other stakeholders on regular basis and helped the team to make better use of these time and estimate more effectively, thus ensuring a healthy sprint progress.
- Kept the teams focused on the sprints priorities, business values, and protecting team from over committing
- Communicated team status/progress via release / sprint Burndown charts, Velocity chart and defects and make sure the stakeholders are aware of what is going on.

Project: Pharmacy Order-to-Cash Process Optimization & Clinical System Support
Client: Walgreens – USA | Company: Genpact – India

Bala Krishna Dasari

Duration: March 2015 – August 2019
Role: Business Analyst / QA Analyst

Key Contributions:

- Provided end-user support for 2nd Largest Pharmaceutical company(USA) in a complex business and information systems environment.
- Worked on Pharmacy related O2C(Order to Cash) transactions .
- Designed and monitored **O2C performance KPIs** such as claim denial rates, refill turnaround time, and billing cycle duration to identify improvement areas.
- Produced **weekly and monthly PMO-level KPI summaries**, highlighting trends in pharmacy order volume, processing errors, and clinical workflow delays.
- Experience in US Health Care System with expertise in Pharmacy and hospital billings.
- Led the implementation and optimization of end-to-end claim lifecycle management including FNOL, adjuster assignments, claims triage, and payment workflows.
- Supported cross-functional initiatives integrating Guidewire ClaimsCenter with external systems (e.g., billing, policy administration, provider networks).
- Used Guidewire experience to structure incident workflows in healthcare claims (Walgreens), managing escalations, documentation compliance, and UAT.
- Worked with IT group, corporate and business unit teams to facilitate support of the ongoing business requirements of an evolving Patient Safety system.
- Supported the design. Development, testing and implementation of new and existing business applications and reports using various levels of research and analysis.
- Simulated or recreated user problems to resolve application difficulties: documenting issues and requirements necessary to correct them or recommending system/parameter modifications to reduce user problems or to enhance system use.
- Worked closely with users to collect and document requirements, as well as conveying these requirements to the Ii group ensuring optimum solution within scope.
- Conducted training classes for new business end-users converting to the Patient Safety System giving them assurance that the new functionality was efficient and user-friendly.
- Coordinated and conducted presentations (over the Web or onsite) to introduce new technology for Patient Safety System. such as: Purchase Order Workflow process and other new Web applications involving .NET and Oracle Database features.
- Performed User Acceptance Testing setting up data and test cases in a UAT environment. At times finding defects during test case setups and documenting and reporting them to the QA team through the Quality Center (Mercury Tool).
- Maintained documents, or and coordinated of Release builds for a Change Request system.
- Produced Release Notes and Coordinated User Release Review sessions explaining the up-and-coming changes to their applications system.

EDUCATION:

- **MASTERS IN ADMINISTRATIVE SCIENCES –Fairleigh Dickinson University CA**
- **GRADUATION IN COMPUTER SCIENCE ENGINEERING**
